We created our knowledge base by picking our top ten terms and coming up with relevant sentences that involve said terms, whether they be definitions or other usages found in everyday conversation. The ten terms are computer, version, story, professor, news, USA, assistant, media, engineering, and electrical.

Here is some sample dialogue:

User: What kind of computer chargers are required?

Bot: USB-C

User: How much would be saved by using one specific charger in the EU?

Bot: Roughly 250 million euros each year

User: When will this change take place?

Bot: In 2023

User: What does this mean for the US?

Bot: US senators are calling for similar laws in the US to save money

```
#knowledge base
